SUMMARY

Business Statistics graduate from Institut Teknologi Sepuluh Nopember (ITS) with hands-on experience in data analytics, forecasting, and business intelligence through academic research and industry projects. Experienced in developing predictive models, building interactive dashboards, and delivering data-driven solutions to support strategic decision-making. Proven ability to transform complex datasets into actionable business insights and develop analytical solutions that drive operational and business improvements. Committed to leveraging analytical thinking and data-driven approaches to solve business challenges and support strategic decision-making.

EDUCATION

Institut Teknologi Sepuluh Nopember (ITS) | Surabaya, East Java, Indonesia

Bachelor of Applied Science in Statistics | Aug 2022 – Present

Current GPA : 3.30 / 4.00

Relevant Coursework : Business Forecasting Methods, Regression Method, Statistical Computing, Data Exploration & Visualization, Database Management, Unstructured Data Methods, Machine Learning, Deep Learning, Risk Management.

PROFESSIONAL EXPERIENCE

Institut Teknologi Sepuluh Nopember | Surabaya, East Java, Indonesia

Research Assistant (Project-Based) - Strategic Research Grant Type A | (Jan 2026 – May 2026)

- Designed and implemented multivariate deep learning models for time-series forecasting, encompassing data preparation, feature engineering, and model optimization.
- Evaluated and refined predictive models through systematic experimentation and hyperparameter tuning, achieving forecasting errors below 10% MAPE.
- Partnered with academic researchers to interpret findings, communicate technical results, and support the development of scientific publications.

PT Mulia Global Solusi | Surabaya, East Java, Indonesia

IT Division Internship | (Jan 2026 – Apr 2026)

- Developed digital solutions, including website modules and interactive dashboards, to enhance operational efficiency and business process automation.
- Created data visualizations and analytical reports using Google Looker Studio, enabling 2x faster identification of product trends for stakeholders.
- Applied forecasting techniques and model optimization to improve demand prediction accuracy, achieving forecasting errors below 10% MAPE and supporting inventory planning decisions.

Institut Teknologi Sepuluh Nopember | Surabaya, East Java, Indonesia

Assistant Lecturer of Database Management | (Sep 2025 – Dec 2025)

- Delivered hands-on mentoring in PostgreSQL database design, query optimization, and data management to more than 30 students.
- Supervised over 10 database and business intelligence projects, providing technical guidance and ensuring the successful implementation of analytical solutions.
- Guided students in building end-to-end analytics workflows by integrating PostgreSQL with Google Looker Studio for data visualization, reporting, and business insight generation.

PT Mitra Pinasthika Mustika Tbk | Surabaya, East Java, Indonesia

Freelance Surveyor | (Mar 2025 – Jun 2025)

- Executed field and online market surveys to collect and validate consumer and market data for business and research purposes.
- Managed end-to-end survey processes, including respondent selection, questionnaire administration, data quality assurance, and dataset documentation.
- Transformed survey findings into analytical reports and actionable insights, supporting marketing initiatives, customer analysis, and strategic decision-making.

Dinas Kehutanan Provinsi Jawa Timur | Surabaya, East Java, Indonesia

Student Internship | (Jan 2025 – Feb 2025)

- Processed and standardized the Forest Product Processing Business Permit (PBPHH) database, resolving data anomalies to ensure high data cleanliness for advanced analytics.

- Developed interactive data visualizations and executive dashboards of the PBPHH issuance history to streamline data-driven decision-making for provincial authorities.
- Executed time-series forecasting models to predict forest product production trends and resource utilization, delivering actionable insights for future supply planning.

PROJECTS

Stock Price Forecasting using Long Short-Term Memory (LSTM)

(Python, TensorFlow, Time Series Analysis)

- Developed an LSTM-based deep learning model to predict the stock price of PT Vale Indonesia Tbk (INCO) using historical time-series data.
- Performed end-to-end data preparation, including preprocessing, feature scaling, sequence generation, model training, and hyperparameter tuning to optimize model performance.
- Evaluated model performance using Mean Absolute Percentage Error (MAPE), achieving 6.8% MAPE and demonstrating the model's effectiveness in capturing stock price trends.

TERLUKA - Burn Wound Detection using YOLO

(YOLO, Object Detection)

- Built a YOLO-based object detection model for automated burn wound identification and severity classification, achieving 85% accuracy on validation data.
- Performed image annotation, dataset preprocessing, augmentation, and hyperparameter tuning to improve model robustness and detection performance.
- Integrated the trained model into a web-based interface for real-time burn wound analysis, enabling users to upload images and receive instant detection results.

EVENT & ORGANIZATIONAL EXPERIENCE

Ini Lho ITS (ILITS)| Surabaya, East Java, Indonesia

Technocraft Playhouse Presenter | (Jan 2025)

- Equipped students with data visualization and dashboarding skills, improving their ability to analyze, interpret, and communicate data effectively.
- Facilitated the development of interactive dashboards using Google Looker Studio, empowering students to generate business insights from real-world datasets.

Olympiad of Statistics Action (OLFACTION) | Surabaya, East Java, Indonesia

Head of IT | (Jun 2024 – Nov 2024)

- Directed IT operations and digital platform development for a national-level statistics competition, ensuring successful deployment and uninterrupted event operations.
- Coordinated stakeholders, technical teams, and event committees to align business requirements with technical implementation and improve operational efficiency.
- Identified and mitigated project risks, proactively resolving technical issues to maintain project timelines and ensure successful event delivery.

TECHNICAL SKILL

Soft Skill	: Analytical thinking, problem solving, adaptability, leadership, management, teamwork.
Programming	: Python, R, SQL, MySQL, PostgreSQL.
Machine Learning & AI	: TensorFlow, PyTorch, Scikit-learn, YOLO.
Data Analytics & Visualization	: Google Looker Studio, Power BI, Tableau, R Shiny.
Tools	: VSCode, RStudio, Microsoft Office.
Language	: Indonesian, English.
